Crafted in 2024 by Alev Ebüzziya Siesbye, a Turco-Danish design virtuoso, these three bowls and three vases, all in sterling silver, emulate the moon in mystery and radiance, mirroring its shifting shape and generous contours, its irresistible attraction and delicate ridges.

Like all formed pieces bearing the Puiforcat name, Séléné takes shape on a spinning lathe, the tool used by the Maison's craftsmen to fashion sterling silver. The vermeil rim embellishing certain bowls is created thanks to the resist technique, used by Jean Puiforcat himself to bring together gold and silver on his Art Deco pieces. Meanwhile, the motifs that adorn the lip of the vases, minimalist lines framing matte-scribe blocks, bring forth a subtle interplay of light and shadow.
